Hallandale's Glassy 38-Story 2000 Ocean Just Broke Ground

By *TNM Staff* on November 12, 2018

Construction is now underway at 2000 Ocean in Hallandale Beach after a groundbreaking ceremony was held last week.

Architect Enrique Norten of TEN Arquitectos designed the oceanfront tower with just 64 residential condo units. Interior design is by Italian design firm Minotti.

All units have biometrically accessed private elevators, with each taking at least half a floor (penthouse units are full floor).

KAR Properties is the developer. KAR is also the developer of One River Point on the Miami River.

Prices start at \$2.6 million. Completion is set for 2020.

Suffolk Construction is the contractor.
